

Figure 1 displays the time series of 10 channels (CH1, CH2, CH3, CH4, CH5, CH6, CH7, STP, SC, TO, RES) over a 24-hour period. The x-axis represents time in hours, ranging from 0 to 24. The y-axis for each channel represents a signal level, with a scale from 0 to 6. The channels show various patterns of activity, including spikes, plateaus, and transitions. CH1-CH7 show similar patterns of activity, while STP, SC, TO, and RES show more complex, multi-level behavior.
